Report on mosquito awareness day

Title: Report on Mosquito Awareness Day

Date-28/09/2024

Time-11. 00am -1. 00pm

Introduction: This report provides an overview of activities conducted on Mosquito Awareness Day, an initiative to educate the public on the prevention of mosquito-borne diseases, such as malaria, dengue, and Zika. The event was held on [date] in [location], targeting communities vulnerable to mosquito-related health issues.

Objective: The primary aim of Mosquito Awareness Day was to spread awareness about the risks associated with mosquito bites, methods of prevention, and the importance of maintaining a mosquito-free environment.

Dr. T. Mallikarjun -sanitary Inspector

Sudhakar reddy -Environmental Executive ITC wov

Devulaiah- ward officer

Shekar - sanitary supervisor

Explained about mosquito diseases

2. Demonstrations on Preventive Measures: Showcasing effective measures like using mosquito nets, insect repellent, and eliminating stagnant water.

3. Distribution of Mosquito Nets and Repellents: Free distribution of mosquito nets and repellent creams to participants.

4. Community Clean-Up Drive: Volunteers helped remove standing water sources in the area to reduce mosquito breeding grounds.

Outcomes:

Increased Awareness: Over 90% of attendees reported a better understanding of mosquito-borne diseases and prevention methods. Community Engagement: Strong participation in the clean-up drive showed community interest in maintaining a healthier environment.

Immediate Action Taken: Many participants immediately began implementing preventive measures, like removing standing water around their homes.

Conclusion: Mosquito Awareness Day successfully educated and empowered the community to take preventative actions against mosquito-borne diseases. The event's hands-on activities fostered a sense of responsibility among participants to create a mosquito-free environment
