

Academic activities :

As part of academic activities, Dept. of Physics has conducted an extension lecture on November 18<sup>th</sup> 2021 on the topic “ Molecular Spectroscopy – Raman Effect”. The Dept. has invited Asst. Prof and HOD of Physics “Dr. Paul Devadanam” of MVS (Autonomous) Degree college, Mahabubnagar, who has given an in-depth knowledge on scattering of light when interacted with matter.

Student seminar :

As part of flipped classes, a student initiated seminar was given by K Prakash of MPCs II, on the topic “Potential Energy due to system of charges” describing the mutual electrostatic attractions and repulsions in the alignment of charges. The session was very interactive and engaging in the discussion, also Rajesh of final year delivered seminar on Poynting theorem and given some inputs in taking up Physics in higher education and regarding the preparation.

Co curricular activities :

Creative club :

On the observation of World Aids Day on December 1<sup>st</sup>, students of creative club have participated in a poster presentation competition conducted by Microbiology dept. With the guidance of creative club mentors, the students have prepared a poster which depicts the awareness on causes of transmission of HIV virus, and theme of World Aids Day 2021 i.e., “ INEQUALITIES, END AIDS”

Success stories :

With the continuous guidance and motivation by dept. of Physics, one of our students named Rajender of MPCs bagged a seat in Central University of Karnataka in the course M.Sc Physics by securing a rank in CUCET 2021.
