ADILABAD.**

NAME: ANKITHA

AGE: 18 YRS

SEX: FEMALE

I.D.NO: 02092/24

REFERAL: COT.T-9975

DATE: 19.03.2024

DEPARTMENT OF RADIOLOGY

CT ABDOMEN - PLAIN AND CONTRAST STUDY

Serial axial sections of abdomen done with oral and iv contrast.

- *Inflammed appendix measuring about 13 mm in diameter noted in right iliac fossa extending into umbilical region. An appendicolith measuring 12x9 mm in the appendix lumen.*
- *Fat stranding around the appendix, caecum and adjacent ascending colon noted.*
- *Edema of few ileal loops in lower abdomen, more in right iliac fossa.*
- *Edema of caecal wall and adjacent ascending colon.*
- *A few dilated small bowel loops noted, largest diameter measures 25 mm.*
- *Fat stranding in right anterior and posterior para-renal spaces with thickening of right anterior renal fascia.*
- *Uterus and ovaries are normal.*
- *Liver is normal in size and attenuation. No IHBD. Portal vein is normal.*
- *Gall bladder is well distended. No evidence of calculi in the lumen.*
- *Pancreas is normal in size and attenuation. Peripancreatic fat planes are normal.*
- *Spleen is normal in size and attenuation. No focal lesions.*
- *Both kidneys are normal in size and attenuation. No evidence of calculi or hydronephrosis.*
- *Bilateral adrenal glands are normal.*
- *Aorta and IVC are normal. No evidence of para- aortic lymphadenopathy.*
- *Urinary bladder is normal. No evidence bladder calculi.*
- *Rest of the bowel loops are normal. Perirectal fat planes appear normal.*
- *Visualised spine and bony pelvis appear normal.*

IMPRESSION:

- **ACUTE APPENDICITIS WITH EARLY MASS FORMATION.**
- **A FEW DILATED BOWEL LOOPS IN THE ABDOMEN – S/O PARALYTIC ILEUS.**

ADVISED CLINICAL CORRELATION

DR. N. KALYAN REDDY
RADIOLOGIST

**GOVT. OF TELANGANA
II INSTITUTE OF MEDICAL SCIENCES (RIMS) ADILABAD

ABDOMINAL SCANNING

Date: 18/3/24

Normal / Increase in size and echotexture. No focal lesions. No IHBD

Size No. wall thickening. No Gall stones

Is normal in size and echotexture. No. focal lesions. No calcification

Normal in size and echotexture. No. focal lesions. No calcification

Splenic vein

88 x 37 mm | Normal in size and Parenchymal and sinus echoes

101 x 42 mm |

adder Well distended. No wall thickening. No stones

VC | Normal

Normal in size

→ RIF obscured by bowel gases

34 x 20 x 39 mm Endometrial thickness 5mm

Mild omental thickening at RIF

ery | — obscured by bowel gases

ery | Size 28 x 17 mm

→ Bladder partially distended

No ascites

No para aortic lymphadenopathy

ion: - RIF obscured by bowel gases

Mild omental thickening at RIF

-Advised: CT abdomen to oral contrast

Suggested Clinical correlation, Please discuss if necessary.

DIAGNOSIS & COURSE IN THE HOSPITAL

Hist - Gangrenous Appendicitis
 Early mass-formation

S/p - Open Appendectomy + TPL
 (R) ADK ↓ SA

TREATMENT GIVEN :

- ZVC - 20ml, 20ml, 20ml

- Zij p/ptaz 45g / IV / 80

- Zij MN0100ml / IV / 120

- Zij Panlong / IV / 80

- Zij Zafex 40mg / IV / 80

- Zij framadol 100mg in Loosmalt / 80

- GRS monitoring

Advise on Discharge :

Medications :

- T. cefixime / PO / 80 - (10)

- T. Panlong / PO / 80 (5)

- T. Uymoral forte / TLD (15)

- T. BC / Vitc / Catz / PO / 80

Sebamycin oint for U/R
